

A Walk in the Woods

Get Set 4
Education

Take a musical walk in the woods.

- ☆ Listen out for woodland sounds:
 - leaves that rustle underfoot
 - breaking twigs
 - birdsong etc.

- ☆ Collect some of the sounds to take home e.g.:
 - leaves to rustle
 - twigs to tap together or snap
 - stones to click together
 - think about recording some birdsong on a phone

- ☆ Recreate woodland sounds at home e.g.:
 - water sounds
 - stomping on the floor to make twig sounds
 - crunching paper to make leaf sounds

Decide how you will put the sounds together.

Record your performance and share it with friends and family!

- You could beat out your footsteps on an upturned container.
- One of you might keep a steady drum footstep beat while the other makes the woodland noises you collected.
- You could have the birdsong recording playing or find some recorded birdsong.
