This week in Year 1...

This week in Maths, the children have been recapping and consolidating their understanding of numbers and number relationships. They have practised recognising numbers written as words and finding one less than a given number. The children have also been comparing numbers using the language greater than, less than and equal to, alongside the symbols $<$, $>$ and $=$. These activities have helped to reinforce their number recognition, counting skills and understanding of number comparisons.

In English, the children have been developing their understanding of spelling, punctuation and grammar. They have explored how the prefix *un-* changes the meaning of a word and practised using capital letters correctly for the names of people. The children have also been reading words with contractions, learning how apostrophes show where letters have been omitted. In addition, they have begun to explore how to use exclamation marks accurately in their writing. In PE, the children have been developing their skipping skills by exploring combination jumping and skipping with an individual rope. They have practised keeping their bodies upright, lifting the rope over their heads and down towards their feet, and turning the rope using their wrists. The children have been building their coordination, balance and control while developing their confidence in using a skipping rope.

Next week's book...

Cave Baby
